SAINT MARKS PLACE

BOERUM HILL

INSIDE OUT

20 21

Inside~Out in the Garden, the second live exhibition of outdoor design curated by Brooklyn-based design studio Kin & Company, explores the post-pandemic contours of social interaction outdoors and in.

Hosted in the garden and gallery for the newly rising residential development Saint Marks Place, designed by INC Architecture and located in Boerum Hill Brooklyn, the show will bring to life a group of the works that were originally conceptualized as part of the Inside~Out virtual presentation examining the role of creative expression during the pandemic.

The show, one of the first live events of the design community in over a year, presents the opportunity for us all to emerge from our cocoons, rebuilding our connections amidst furniture and sculptures by 20+ independent design studios and emerging talent.

Inside~Out In the Garden conveys designers' cautious optimism and a glimpse of a time when we will be together again, although forever changed.
